

Find the Dinosaur

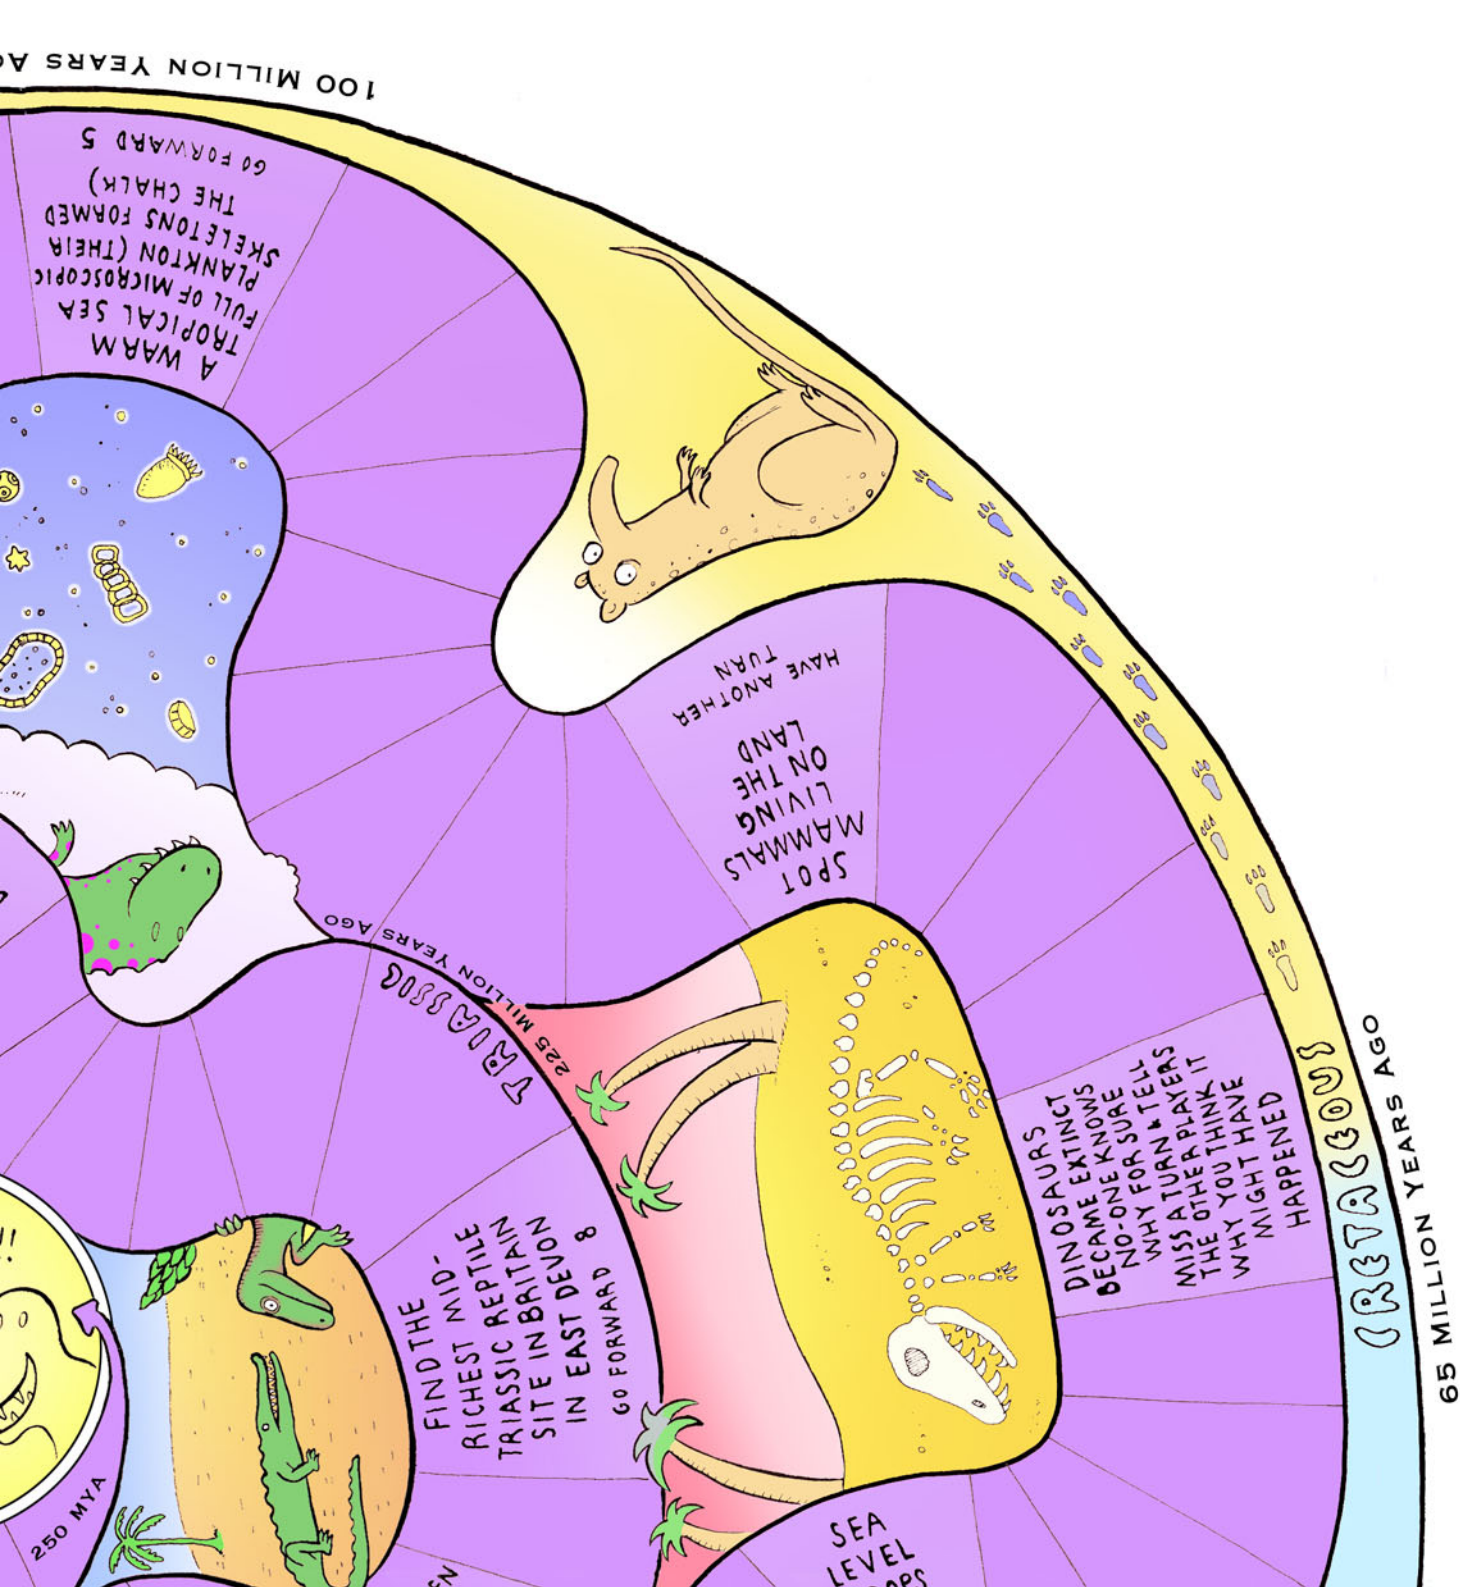

How To Play

1. Print out the 4 sections of the board (card might be better than paper) and stick them together.
2. Print out time machine counters and sample cards.
3. Colour them in, if you like.
4. You can play with 2 or more players.
5. Take turns to throw a single dice and proceed along the board, moving back in time.
6. To finish you must collect all 5 sample cards. As you approach a sample square you must throw the right number to land on it or miss a go until you do.
7. The winner is the first person to get all 5 cards and find the oldest dinosaur.

Remember: Although you are going **forwards** round the board, you are going **backwards** in time - **About 190 million years!**
